Front-End Web Developer | Software Engineer | Project Engineer at Wipro

I am a highly skilled and ambitious web developer with over 6 years of industry experience as a Project engineer at Wipro. Initially, I worked with databases before transitioning to front-end programming and providing my team with an automated progressive web app built with ReactJS, JavaScript, HTML, and CSS frameworks. I am currently looking for a web developer position to expand my expertise in technology.

WORK EXPERIENCE

Wipro, Chennai - Project Engineer

May 2018 - PRESENT

- I analyze and update data in a database used for development.
- For the majority of data updates, we use our client tools (Upoint). When we receive large volumes of data, updating it in tools takes too long, so we use SQL queries to update it.
- I did find solutions to do the manual work 30% faster than previous regular methods.
- My work hours were 100% flexible, and I used to assist other teams in moving code files from SVN to Bitbucket (a cloud service).
- Later on, I started working with the front-end development team to update the UI components.
- The majority of my job here entails performing feature-level release upgrades by changing UI components and adding tiny features such as buttons, navigation, and so on.
- Move data to higher life cycles using Jenkins jobs on a monthly release basis.
- I developed a React Progressive Web App (PWA) using HTML, CSS, JS & ReactJS for my team, which creates SQL queries automatically in minutes rather than hours or days when done manually.
- This tool enabled our team to produce queries 90% quicker and update data nearly 100% error-free.

PERSONAL PROJECTS

Upoint-SQL Query Builder - Alight Solutions - [Live Site](#)

July 2022 - Dec 2022

- This is a React Progressive Web App (PWA) that I developed to minimize my team's work by generating SQL queries automatically.
- HTML | CSS | React JS | Bootstrap.

CreativeCreatures - My Business Website - [Live Site](#)

Jan 2023 - Jan 2023

- This is my business website. It also allows folks to know about my business, see my sample work, and contact me through the social media accounts listed on the site.
- HTML | React JS | Tailwind CSS, | Ripple UI.

FEEDBACK BY CLIENT

Brenda Novak (Manger from Alight)

I have enjoyed working with Hari at Alight. He has been flexible with his time to work U.S. daytime hours when we needed someone to be available. He has very good communication skills. He helped brainstorm and provide alternate suggestions when we were working through some unusual data situations. He is continuing to expand his knowledge and skills regularly. ([Link to Feedback](#))

TECHNICAL SKILLS

Core Java | HTML | CSS | JavaScript | React JS | SQL | Redux | JSON | Tailwind CSS | Bootstrap | Material UI | GitHub | JIRA | User Interface & Responsive web Development

SOFT SKILLS

Collaborative | Creativity | Problem-Solving
Effective Communication

EDUCATION

BITS Pilani, India. — *M.Tech*

May 2019 - Nov 2022

- ❖ Software Engineering/Computer Applications
- ❖ Aggregate: 76%

CERTIFICATIONS

- ❖ JAVA certified
- ❖ HTML Certification
- ❖ JavaScript Certified

ACHIEVEMENTS

Desperate Developer — Alight

Because I adore web development, I created a project for my team that automatically generates SQL queries in minutes rather than hours or days when done manually in a more efficient way.

INTERESTS

Coding | Writing | Video Editing | Cooking | Travelling | Learning Languages | Cycling

MENTORSHIP

During the lockdown, I tutored 11 students (my juniors) using my knowledge of Java programming and experience in the IT business while working from home. This aided them in clearing their assessments, preparing for the interview, and landing their first job.
